

We are industry experts,
providing responsive,
trustworthy service with a
solutions-oriented approach.

That's our *partnership promise*.

GV View, GeoVerra's online portal, empowers clients to take control of project deliverables anytime, and anywhere.

Internally, GV View Web Mapping is used by GeoVerra team members as their primary spatial data repository; CAD Operators import required datasets directly into their drafting software, Quality Control Analysts use the web map to verify spatial data, and Project Managers use it to review past projects and plan new ones.

What does this mean for you? It means you will have access to the most up-to-date project deliverables with the click of a button and the assurance you are receiving quality, relevant data-backed solutions.

What can you do with GV View's Web Mapping Application?

Mapping and Visualization / Data Management / Design and Planning / Decision Support and Analysis

Features and Benefits

- View all of your GeoVerra projects on one map
- Web services available to consume in your enterprise GIS environment
- Locate projects and sites, quickly
- Download project deliverables
- Access satellite imagery that is guaranteed to be updated each year
- View public energy datasets overlaid on a single map

Recent Improvements to the Web Mapping Application

- Faster performance
- Simpler interface
- Embedded document management
- More complete search results, including a more extensive repository of survey plan documents and more satellite imagery:
 - ArcGIS Online high-resolution satellite imagery (50 cm)
 - Planet Labs annually updated medium resolution satellite imagery (1.5 m)
