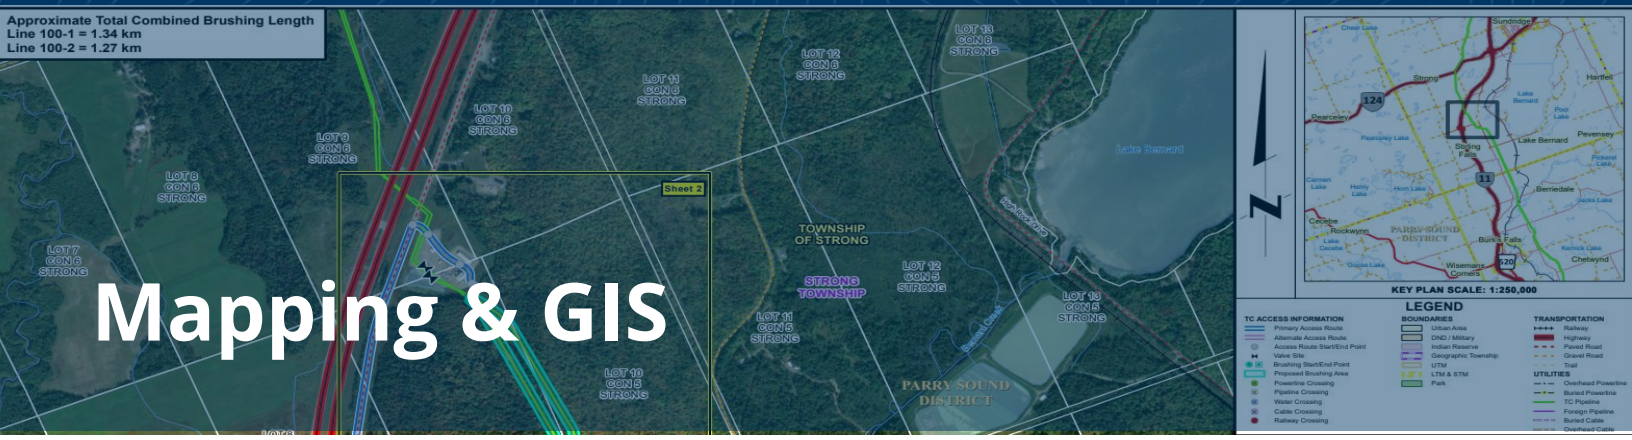
GeoVerra



Mapping & GIS

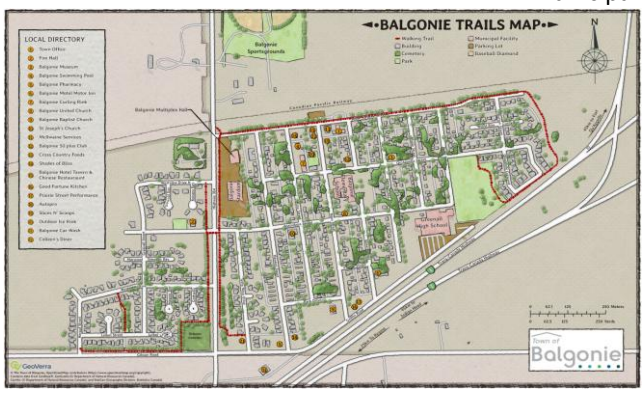
At GeoVerra, spatial data is core to what we do. Mapping and GIS technologies help us to achieve remarkable things and better understand the world around us, while improving productivity, communication, collaboration, and safety.

Our industry-leading experts present data to our clients in rich, engaging, and easy-to-understand visual formats, delivering insights that support effective decision-making and drive projects forward on time and on budget.

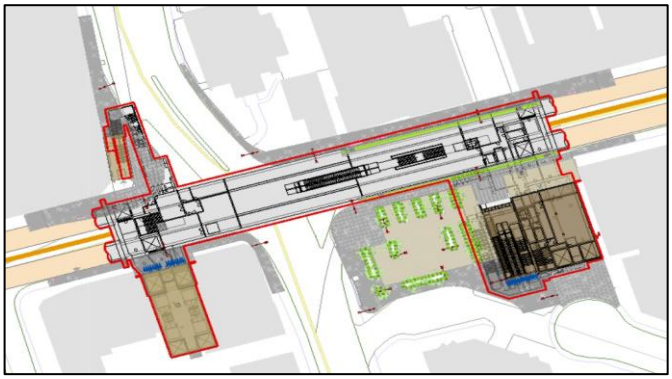
We use the latest Autodesk® and Esri® software to offer comprehensive mapping and GIS services for clients in diverse industries. Whether you have your own spatial datasets or not, our experienced Cartographic, GIS, and CAD experts can provide a wide range of maps, reports, visualizations, and applications so that you have the insights needed for project success.

Transforming complex data sets into something interactive is what we do at GeoVerra. We collect, analyze, and display project information in one place so that our clients can make meaningful, data-driven decisions. Whether you need a standardized online solution (GV View) or a custom online portal, our data visualization programs can help you design and build with confidence.

Municipal



Engineer/Design



Cartographic Visualization – More than just Maps:

Map Series	Reports
3D Renders	Web/Mobile Apps
Charts/Dashboard	Modeling

Using the Industry's Best Data – GV Collected or Quality Venders:

Imagery	Dispositions
Land use & Civic Boundaries	Legal Parcels
Environment Data	DLS Grid
Transportation / Access	CLS (Canada Lands Survey)
Elevation & Contours	Regulatory Layers
