

Road Management Services (RMS)

GeoVerra's Forestry and Environmental team members have been providing timber, environmental and land management services to the energy and forestry sectors since 1995.

Our RMS software is a user-friendly system made for any industry road licensee and their road users. It is a one-stop shop for licensees looking to track assets, manage road budgets, and recover costs in a fair and efficient manner from third-party users. RMS and our team of experts behind it allow our clients to recover the costs of maintaining a safe worksite and control the liability of owning and maintaining a lease road on public lands.

Software Capabilities

- Tracks industrial road assets
- Receives and tracks road-use requests
- Notifies field representatives
- Manages budgets
- Creates and tracks invoices
- Supports road restrictions and tracks users
- Assesses annual maintenance budget and billing

Unique User Benefits

- A custom visual experience
- User-friendly
- Only software to track individual user loads
- Custom development for unique circumstances
- Team of experts for support and administration
- Over 20-years of experience
- Allows clients to recover costs

The RMS Experience

- A custom visual experience
- User-friendly
- Only software to track individual user loads
- Custom development for unique circumstances
- Team of experts for support and administration
- Over 20-years of experience
- Allows clients to recover costs
