

## Location

Lac La Biche, Alberta

## Client

WSP Canada on behalf of Canadian National (CN) Railway

---

## Project Description

GeoVerra's legacy company, WSP, was contracted by CN Rail to provide engineering drawings for rail upgrades in the town of Lac La Biche, AB. WSP, who has previously collaborated with GeoVerra on similar work, engaged the team to perform a detailed topographic survey to facilitate engineering design.

## Why GeoVerra – Trusted, Responsive, Reliable Solutions

- As a trusted advisor, GeoVerra has worked with WSP on numerous occasions to perform rail surveys on behalf of CN Rail. With team members across the country, GeoVerra has a large pool of internal resources with expertise in rail surveys, and aims to deliver high-quality work for clients. GeoVerra is a dependable partner for any railroad-related projects and has extensive experience in both rail construction and topographic surveys. As one of Canada's largest geomatics companies, GeoVerra has field offices from British Columbia to Ontario so that we can deploy teams with local knowledge and the required safety certifications at the drop of a hat and scale quickly to meet project needs, quickly and safely. Safety is a core value and priority for GeoVerra, and as such, strict adherence to CN's stringent safety policies was of utmost importance.. It our GeoVerra's goal to create an environment where Health and Safety is not just a program, but it is our way of life.

## Primary Services

### Topographic Survey

- GeoVerra completed a detailed topographic survey of approximately 5 miles of railroad near Lac La Biche, AB, as well as all utilities located along the railroad.
