

Trusted Surveying & Geospatial Solutions for Municipalities

GeoVerra is Canada's leading provider of surveying, geospatial, and GIS solutions for municipalities. From water and wastewater facilities to road networks and public buildings, we deliver accurate data and advanced technology to help cities plan, build, and maintain infrastructure efficiently and cost-effectively.

What We Bring to Your Projects & Cities:

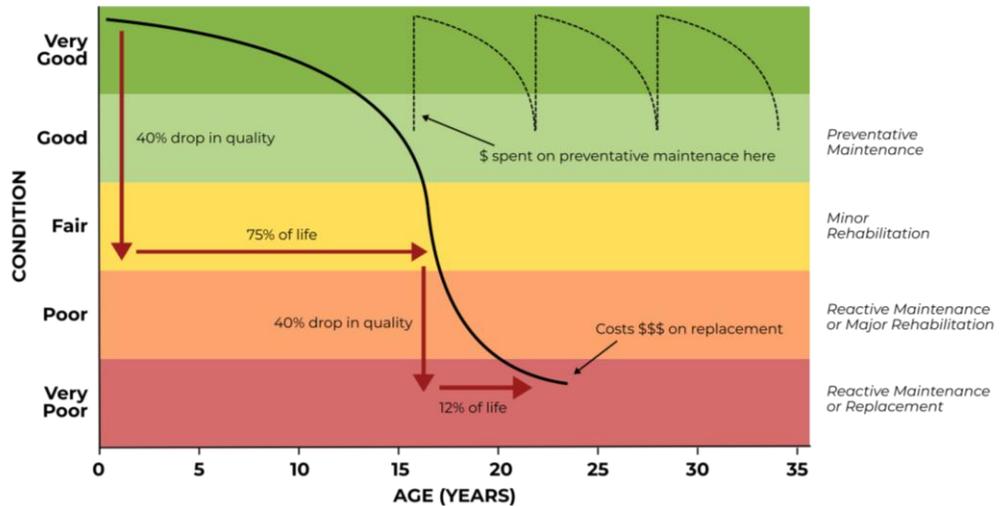

- Traditional surveying + cutting edge-technology
- Effective step-by-step planning
- Improved asset management
- Sustainable growth
- Land use planning professionals
- Lifecycle cost reduction
- Budget planning
- Risk mitigation
- Energy efficiency
- Asset longevity

Why Municipalities Can Trust Us:

- ISO-aligned quality management
- Advanced technology = the most accurate data and results
- We're responsive and efficient
- Solutions-oriented
- 23 office locations across Canada
- 600+ team members
- National and local expertise

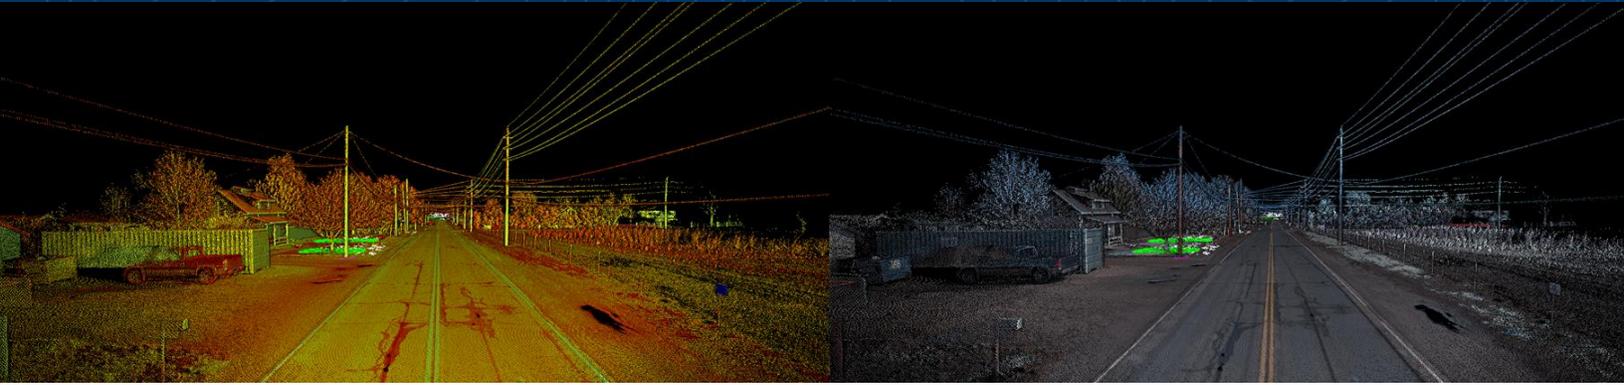

The Importance of Preventive Maintenance

Preventive maintenance costs less than **3% of full reconstruction**, making early action the smartest way to protect your roads and budget.

Our Portfolio of Services & Solutions:

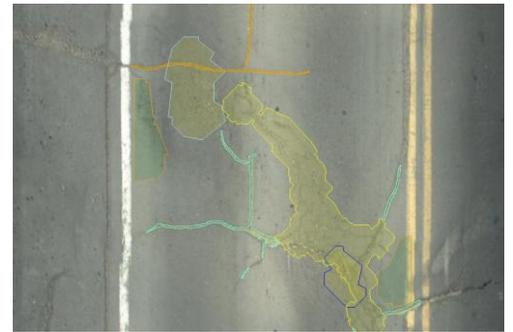

Mobile Mapping & Pavement Analysis

Our Mobile Mapping Systems (MMS) deliver millimeter-level accuracy for pavement condition assessments and road asset inventories. We provide **PCI** and **IRI reports**, GIS dashboards, and actionable insights for optimized maintenance planning.

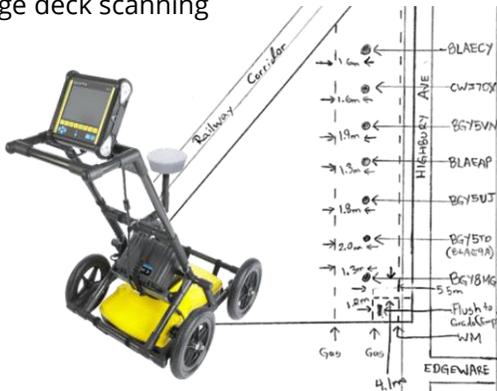

Advanced Data Processing & Analysis

Utilities Mapping – Ground Penetrating Radar (GPR)

Non-invasive, highly accurate subsurface imaging for utility locating, void detection, and road evaluation. Applications include:

- Utility and buried object locating
- Leak detection
- Daylight
- Bridge deck scanning

Mapping & GIS Portals

We transform complex spatial data into interactive maps, reports, and dashboards using Esri® and Autodesk® platforms. Services include:

- GIS analysis and data processing
- Custom web and mobile apps
- 3D models and Google Earth deliverables
