

Survey Partner Built for Defense Construction Projects

Delivering secure, compliant and precise geomatics services for Canada's most critical infrastructure.

650+ team members across Canada

23 locations = local + national expertise

Security level: **Facility Security Clearance**

100+ adv. geospatial tech equipment

Full Suite of Survey Services for Full Project Lifecycles

From traditional surveying to advanced geospatial technology, we're your one-stop-shop for all your survey and geospatial project needs, throughout the lifecycle of your project.

Proven Capacity, Scale & National Reach

We have more major project experience than any other survey company in Canada. With deep bench strength across Canada, we mobilize quickly, meet tight timelines, and deliver with precision.

DCC Approved Security, Safety & Compliance

Approved compliance with federal safety, security, privacy and we hold proper Facility Security Clearance.

Expertise for Risk Reduction

Currently working on active DCC projects, we support secure infrastructure delivery, lifecycle asset management for risk reduction across highly regulated federal environments

Superior Quality & Consistency = Error Mitigation

ISO-aligned standards, automation and disciplined processes that reduce errors, prevent delays and keep projects and subcontractors moving without downtime.

Secure Data Handling & Storage

Industry leading cybersecurity and IT systems for secure data handling and storage protocols.

The Advantage of Working Together & the numbers to back it up

- **CLIENT SATISFACTION:** 95% client rating
- **RESOURCES:** Largest capacity, locations & geomatics equipment in Canada
- **SAFETY:** 2026 TRIF = 0 | 1.6M hours worked | 25,000 reports/yr
- **QUALITY:** Less than 4 quality non-conformances in 2025
- **SECURITY:** 7 layers of cybersecurity, zero cyber incidents
- **REPORTING:** Accuracy, budget monitoring & daily uploads
- **RISK MITIGATION:** Proven processes with ISO alignment

Full Suite of Survey Services for DCC

- Land surveying (legal surveys)
- Pre-design, design / construction surveying
- Line locating / SUE
- Existing conditions documentation
- Long-term asset management
- As-built surveys
- Deformation / settlement monitoring
- Structural / verticality surveys
- Data formatted to federal standards/systems

Geospatial Services

- GIS & 3D web portals
- Bathymetric surveys
- Terrain modeling
- SCAN to CAD
- SCAN to BIM
- High-accuracy geospatial databases
- GIS integration
- Mobile mapping
- LiDAR
- Digital twins

Our Value to DCC Projects

- Acceleration, cost certainty & risk reduction
- Reduced change orders
- Faster project approvals
- Support for entire project lifecycle
- Improved decision-making
- Aligned with federal modernization & digitization goals
- Indigenous Partnership commitment
